

## MARINATEX

MarinaTex is designed to help solve the growing concern of single-use plastics and the ocean plastic crisis.

MarinaTex is a high-quality home-compostable material developed for the packaging industry as a planet-conscious alternative to translucent plastic film. The new bio-based material has been shown to biodegrade in 4-6 weeks. It does not leach harmful chemicals and it has a higher tensile strength than LDPE at the same thickness.
